## Profile

Seeking a beginner role to enhance and explore my technical skills .

A quick learner with an aptitude for adapting to new technologies and collaborating effectively within cross functional teams.

## Education

| | |
|---|---|
| **Walchand Institute of Technology, Solapur** | **Dec 2021 - July 2025** |
| *Bachelor of Technology in Computer Science; CGPA: 9.26* | *Solapur, Maharashtra* |
| **Dayanand Science College , Latur** | **2020-21** |
| *12th Board (HSC);Percentage: 97.83* | *Latur, Maharashtra* |
| **Mahatma Gandhi Vidyalaya , Karmala** | **2018-19** |
| *10th Board (SSC);Percentage: 89.20* | *Karmala, Maharashtra* |

## Internship

**Full Stack Web Development, Placify Technologies**                    **Jan 2024 – Feb 2024**

- Completed comprehensive training in PHP programming language, covering fundamentals of HTML and CSS.
- Developed a mini-project utilizing PHP to reinforce learning objectives.
- Awarded internship completion certificate for successful participation and project completion.

## Projects

**Contact Management System|** Python

This is a simple GUI based project which is very easy to understand and use. It contains all the required functions which include adding, viewing, deleting and updating contact lists.

**IoT-based Garbage Management System** (Status- Ongoing ) **:**

( Sponsored by- P.A.H. Solapur University Solapur)

The IoT-based garbage management system uses Raspberry Pi 5, sensors, and features like gesture sensing, automatic lid opening/closing, and voice recognition. This smart bin improves waste disposal by enabling hands-free operation and voice commands for enhanced hygiene and convenience.

**Employee Management System -TODO_Sys |** Php

Developed an Employee Management System in PHP, facilitating efficient administration and organization of employee information and tasks. Designed for two user roles – admin and employee – the system enables administrators to effectively manage employee details and project submissions. Employees benefit from streamlined registration, profile updates, and password management features.

## Technical Skills

**Languages —** C , Java Basics , Python,DSA,Git

**Database —** MySQL, MongoDB,

**Web Technologies** — HTML , CSS , JavaScript , Php

## Certificates

1. **Python Foundation Certification** | Infosys Springboard
2. **Database and SQL |** Infosys Springboard
3. **Web Development (HTML,CSS,Js,Php)** |Placify Technologies

## Achievement

**LOGICA 3.0**

Participated in a project competition held in Pune and received a certificate of recognition.

Presented on the IoT-Based Smart Garbage Management System at the **4th International Conference on Sustainable Expert Systems** (ICSES 2024), October 2024.
